

Employability and Leadership

Employability and Leadership Development Programme

This will be a compulsory course at HPFS Sixth Form. Employment is rapidly changing and it is necessary for employees to be equipped to cope with change. We want our students to be the best. Whether they want to go to university, or indeed enter a graduate training route, it is important that they can exhibit employability and leadership skills. They must have developed their resilience and problem solving skills so that they are clear about their personal values, as they face decisions in their futures. Graduate routes are changing with the introduction of the Apprenticeship Levy and a wide range of companies are offering more opportunities for trainees to enter graduate apprenticeships with them working in partnership with universities.

This programme will be based on project briefs set by external organisations. There will be opportunities built into each brief to develop skills such as:

- communication
- team building
- presentation skills
- problem solving
- initiative

And many more.... For those that excel there will be the possibility of internships with partnership companies.
