

# Art & Design

## Why Art & Design?

- You will be well prepared for a future career in a creative industry
- Many students go on to further studies, leading to careers in graphic design, fashion, illustration, architecture, painting, sculpture and photography
- You will build a portfolio to use in university interviews
- You will have an opportunity to further develop your artistic skills

## Art & Design A Level

Creative skills are vital to the British industry. A-level Art and Design will enable you to develop your artistic ability across an exciting range of techniques, experimenting with effects and concepts. This course is hands-on, with the emphasis on creating imaginative individual work. Students will visit galleries and take part in art workshops to extend specialist skills and knowledge.

## Entry Requirements

Though no previous art qualification is required, a keen interest in the subject is essential. You will need at least a grade 4 in GCSE English. You will have four lessons each week and, in addition, you are required to do a further three hours of independent study.

*'Creativity is allowing yourself to make mistakes. Art is knowing which ones to keep.'*  
Scott Adams
